PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in full-stack development, cloud computing, and AI-powered automation systems. Highly skilled in React.js, Next.js, Node.js, Python, AWS, Docker, and OpenAI APIs with a track record of delivering scalable web applications and intelligent workflows. Proven ability to optimize web vitals (improving SEO by 98% and reducing load times by 35%) and automate business processes (reducing content-processing effort by 60%). Strong foundational knowledge in software engineering, algorithms, machine learning concepts, and scalable system design.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT) <i>B.Tech. in Computer Science and Engineering; CGPA: 8.02 / 10</i>	Bhubaneswar, India <i>2023 – Expected 2027</i>
---	---

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), C, C++, SQL, HTML5/CSS3
Frontend Development: React.js, Next.js (App Router), TailwindCSS, Responsive Web Design
Backend Development: Node.js, Express.js, RESTful APIs, API Integration
Cloud & DevOps: AWS (EC2, S3, IAM, VPC), Docker, Git, GitHub, CI/CD Basics
AI & Machine Learning: OpenAI/Claude APIs, n8n Workflow Automation, RAG, TensorFlow, scikit-learn, Pandas
Databases & Core Concepts: MySQL, MongoDB, Data Structures & Algorithms, Object-Oriented Programming

EXPERIENCE & PROJECTS

Independent Full-Stack Consultant & Contractor <i>Freelance Web Development (Fiverr)</i>	Remote <i>Jan 2024 – Present</i>
- Engineered and deployed 5+ dynamic, full-stack web applications utilizing Next.js, React.js, Node.js, and REST APIs for international clients. - Boosted search engine visibility and performance metrics by 98% using Next.js Server-Side Rendering (SSR), metadata customization, and Core Web Vitals optimizations. - Decreased page latency by 35% through advanced asset management, image compression, lazy loading, and frontend caching strategies. - Integrated secure RESTful APIs and modern database layers to support client feature demands, improving conversion and retention metrics.	
AI Automation Systems Engine <i>AI/ML Engineering Project</i>	Remote <i>2025 – Present</i>
- Architected autonomous AI workflows using OpenAI APIs and n8n orchestration, reducing manual data/content processing effort by 60%. - Designed and implemented robust Retrieval-Augmented Generation (RAG) pipelines to parse external documents and supply contextual grounding to LLMs, improving factual accuracy by 40%. - Optimized prompt templates and context-window injections, improving automated execution speeds and response relevance by 45%. - Created SaaS-style automation pipelines featuring robust error-handling, payload validation, and multi-step API integrations.	
Campus Second-Hand Marketplace <i>Full-Stack Real-Time Platform</i>	Remote <i>Feb 2025 – Mar 2025</i>
- Developed a scalable peer-to-peer marketplace utilizing React.js, Node.js, Express.js, and MySQL, designed to support students across 25+ campuses. - Engineered bi-directional real-time chat utilizing Socket.io, improving user-to-user communication efficiency by 50%. - Designed high-performance SQL schemas, optimizing database indexes and search queries to slash API response latencies by 30%.	

- Implemented custom collaborative-filtering algorithms to match products with student preferences, boosting product matching accuracy by 40%.

Multi-Camera Surveillance Architecture

Remote

Co-Author, Smart City Surveillance (AIMV 2025)

Jan 2025 – Present

- Co-authored research outlining a scalable multi-camera ingestion pipeline for smart city surveillance and urban monitoring.
- Designed a distributed software architecture utilizing PyTorch and computer vision frameworks to synchronize and aggregate multi-stream video inputs.
- Integrated automated anomaly detection systems, optimizing video stream processing to improve detection scalability.

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations (Amazon Web Services, 2026)

GitHub Foundations – Version Control Systems (DataCamp, 2025)

Python Essentials & OS Fundamentals – Network Administration (Cisco Networking Academy, 2024)

AWS Emerging Talent Community Member – Amazon Web Services (2025)
